Re: Big Basin Water Company, AL 83 -W 2023 General Rate Case

Dear Big Basin Water Company and California Public Utilities Commission,

I am writing to support the proposed water rate increase of 55.59% requested by Big Basin Water Company in Advice Letter 83-W dated December 20, 2022, and described in the Notice of Proposed Rate Increase letter mailed to customers on March 18.

As a customer of Big Basin Water Company, I understand additional funds are needed to continue operating the water system.

I hope that the CPUC will carefully evaluate this proposal and make a decision that is in the best interests of the community.

Sincerely,
